

PUMPKIN CARVING STENCIL

STEP 1 | PRINT AND PREPARE

Print your chosen stencil. Trim around the edges of the design if desired for easier placement. Make sure your pumpkin is clean, dry, and smooth where you will place the stencil.

STEP 2 | TAPE AND TRANSFER

Tape the paper directly onto your pumpkin. Using a pin or thumbtack, poke holes along the black lines and edges of the design to outline your chosen River Cats image. Once the full design is dotted, carefully remove the paper. Your carving guide should be visible.

STEP 3 | CARVE SAFELY

Always carve away from your body and hands. Start with the smallest details, then move to larger cuts. Use gentle sawing motions with your carving tool; do not force it.

STEP 4 | SHOW YOUR SPIRIT

When finished, show off your River Cats pride by sharing your pumpkin with us on social media!
